ABSTRACT

State-by-state statistical summaries of public elementary and secondary education in the 50 states and the District of Columbia are provided in this report, with listings of 1981-82 institutional, pupil, staff, and finance data. In addition, state profiles show the ranking of each state for each selected characteristic, as compared to other states. General data categories include the number of school districts, enrollment, number of high school graduates, employment statistics, school district revenues, current expenditures, and fixed charges. Selected characteristics profiled include number of school districts; number of schools; average daily attendance; pupil/teacher ratio; pupils per square mile; revenue per pupil (from local sources, intermediate sources, state sources, and federal sources); current expenditure per pupil (for instructional services, support services, and noninstructional services); employee benefits per employee (FTE); officials/administrators per 100 employees; and classroom teachers per 100 employees. National Center for Education Statistics

"The purpose of the Center shall be to collect and disseminate statistics and other data related to education in the United States and in other nations. The Center shall . . . collect, collate, and, from time to time, report full and complete statistics on the conditions of education in the United States; conduct and publish reports on specialized analyses of the meaning and significance of such statistics; . . . and review and report on education activities in foreign countries."--Section 406(b) of the General Education Provisions Act, as amended (20 U.S.C. 1221e-1).

Foreword

This compendium is the fourth in a series of compilations of institutional, pupil, staff, and finance data about local education agencies presented in summary and profile form. The State summary shows the actual data reported for the LEA's in each State and percent distributions of certain variables. The profiles show how each State ranks with respect to other States on each of the selected variables. The compendium is intended as a quick reference source for persons needing easily accessible information about elementary and secondary education in a particular State. Other NCES publications provide more detailed information about State public school systems.

We wish to acknowledge the data processing support provided by Janet Swann.

Norman D. Beller
Assistant Administrator
Division of Elementary and
Secondary Education Statistics

Introduction

When the U.S. Office of Education was created by the Congress in 1867, it was given responsibility for gathering data about education in the United States. Its mandate was to "collect such statistics and facts as shall show the condition and progress of education in the several States and territories." Since 1965 this function has been assumed by the National Center for Education Statistics (NCES). The purpose of the Center shall be to "collect, collate, and, from time to time, report full and complete statistics on the conditions of education in the United States." -Sec. 406(1) of the General Education Provisions Act, as amended (20 U.S.C. 1221e-1).

This compendium aggregates State statistics about public elementary and secondary education in the 50 States and the District of Columbia. These data, provided by local education agencies (LEA's), provide quick access to selected statistics most frequently requested. In addition, it shows the rank of the State for each selected characteristic with respect to the distribution of the characteristic among the States.

Data Sources

The National Center for Education Statistics and representatives from each of the State education agencies (SEA's) jointly developed the Common Core of Data reporting system from which the local education agency (LEA) data included in this compendium were selected. These data were reported to the SEA's by LEA's and compiled by the SEA's for the Center.

The data presented in this compendium represent State aggregates of these LEA reports. Data about SEA operations and schools operated by these agencies are not included.

Comparability

Definitions of terms used by State education agencies (SEA's) to collect data from local education agencies (LEA's) are not uniform from State to State. Furthermore, each State sets forth its own recordkeeping and accounting requirements. This results in some lack of comparability among the States with respect to the more detailed aggregates and must be kept in mind when comparisons are made among the States.

Several known instances of lack of comparability among the States are described below. California includes "legal" absences with days attended in computing average daily attendance, while other States do not. States vary in their designations of grade spans used to classify membership as elementary or secondary. (The grade span used by each State is shown on the State summaries.) Few States count fall membership

on October 1, but all are within a week or 10 days from this date. Total expenditures are generally comparable, but expenditures reported by function are not. For example, some States will include expenditures for school administration as instruction, while others will charge it to support services.

As a result of this lack of comparability, absolute comparisons among the States on some characteristics must be interpreted with caution.

Notes On Finance Data

Current expenditures were made for or on behalf of LEA's by other agencies in some States during the 1981-82 school year.

Current expenditures made for or on behalf of local agencies by other agencies are paid for out of revenues generated by the agencies making such expenditures. Such expenditures, therefore, are not charged as LEA expenditures and are not reflected by the revenues generated by the local agencies. These expenditures are a form of indirect State aid and may be reflected by lower local property tax rates, since the local agencies do not need to generate revenues to support these expenditures.

To show how the States differ with respect to this type of funding mechanism, two sets of current expenditure data are presented in this compendium. One reflects current expenditures made by LEA's and the other, total current expenditures made for services provided by local agencies (including expenditures made for or on behalf of local agencies by other agencies).

This compendium presents (1) only revenues received by LEA's and (2) current expenditures for services provided by local education agencies and made by local agencies and other agencies. Total revenues and current expenditures for public elementary and secondary education in each State are not presented here since the compendium does not include financial data on elementary and secondary education services provided by such other agencies as State-operated schools for the handicapped, prison schools, and mental institutions.

Methodology

A profile of selected characteristics is plotted under a rank scale opposite each State's summary of data. The value of each State's characteristic is given opposite the profile. These profiles show how each State compares with the other States and the degree of variability among the characteristics within the State.

Ranks are presented in descending order, i.e., the State having the highest value for a characteristic ranks 1; the State having the lowest value ranks 51 (or lower if the value was not reported for all States).

Ranks must be interpreted with care. The distribution of values for each characteristic affects the ranks. For example, a difference of less than 0.5 in pupil teacher ratio may shift a State's rank by 10 positions. On the other hand, a difference of \$20 million in total current expenditures might shift the State's rank by only one or two positions on the scale.

All of the data included in this compendium were compiled by the SEA's from source records and reports for the Center.

Definition of Terms

The definitions are presented in the order that the terms appear in the Compendium.

Operating School District. A minor civil division of the State that operates schools for its resident school-age children.

Nonoperating School District. A minor civil division of the State that provides educational services for its resident school-age children by contracting with other school districts on a tuition or other basis to provide such services.

Elementary School District. One that provides instruction for pupils in any combination of grades below grade 9 with at least one grade below grade 7.

Secondary School District. One that provides instruction for pupils in any combination of grades above grade 6, but not higher than grade 12.

Unified School District. One that provides instruction for pupils in any combination of grades, at least one of which is below grade 7 and one above grade 8.

Fall Membership. The number of pupils on the official roll of local school districts as of October 1 of the school year or the nearest date thereto when the count is taken by the State.

Elementary. The number of pupils in membership in grades classified by the State as elementary grades.

Secondary. The number of pupils in membership in grades classified by the State as secondary grades.

Note: The grade spans included within each level are shown for each State.

High School Graduates. The number of persons completing high school graduation requirements in regular day school programs operated by local school districts who were awarded high school diplomas during the school year. This does not include other persons receiving high school diplomas from other programs or high school equivalency certificates.

Total Employed. The full-time equivalent number of persons employed in local school districts.

Officials/Administrators. The full-time equivalent number of employed persons assigned to administrative duties, including principals and assistant principals.

Professional/Educational. The full-time equivalent number of professionals assigned to teaching and educationally related duties such as counseling, library services, etc.

Other Professionals. The full-time equivalent number of persons assigned to professional tasks such as food service management, planning, evaluation, etc.

Nonprofessionals. The full-time equivalent number of persons assigned to duties such as secretarial/clerical, custodial, transportation, etc.

Revenues. Additions to assets of LEA's that do not: (1) increase any liability; (2) represent the recovery of a prior expenditure; (3) represent the cancellation of certain liabilities without a corresponding increase in other liabilities or a decrease in assets.

Local Sources. Amounts raised by taxation and other means from within the boundaries of the local school districts.

Intermediate Sources. Amounts raised by minor civil divisions of the State between the local school district and the State and returned to local school districts on a formula or some other basis in amounts that differ from the amounts collected in each local school district.

State Sources. Funds received by local school districts from State government agencies in the form of grants-in-aid.

Federal Sources. Funds received by local school districts from Federal agencies in the form of grants-in-aid, either directly or through State agencies.

Current Expenditures. Expenditures of the current year made to provide direct educational and support services. Current expenditures do not include debt service payments, expenditures for the acquisition and construction of buildings, or expenditures for community services provided by local school districts.

Instruction. Expenditures for salaries and materials used to provide instructional services.

Support Services. Expenditures for administrative, technical, and logistical support to facilitate and enhance instruction. Pupil support, staff support, transportation, administration, plant operation and maintenance, and other support services are included in this category.

Noninstructional Services. Expenditures for enterprise types of activity such as net expenditures for food services and student body activities.

Fixed Charges. Employer contributions for employee benefits and expenditures made for rents, insurance premiums, etc.

Employee Benefits. Expenditures made by school districts for the benefit of employees such as contributions to employee retirement systems, workman compensation, group health and life insurance plans, etc.

Other Fixed Charges. Expenditures made for rents, insurance premiums, etc.

Average Daily Attendance. The aggregate days attended by students enrolled in public schools divided by the number of days in the school term.

Pupil/Teacher Ratio. Fall membership divided by the full-time equivalent number of teachers as of October 1 or the nearest date thereto when these counts are taken by the State.

Pupils per Square Mile. The fall membership divided by the number of square miles in the State.

Revenue per Pupil. Revenue divided by the average daily attendance.

Current Expenditure per Pupil. Current expenditure divided by average daily attendance.

Employee Benefits per Employee. Total expenditures for employee benefits divided by the full-time equivalent number of employees. Note: Employee benefits were not reported by 16 States; hence, the ranks are based upon 35 States that reported.

Officials/Administrators per 100 Employees. The full-time equivalent number of persons classified as officials/administrators divided by the total full-time equivalent number of employees multiplied by 100.

Classroom teachers per 100 Employees. The full-time equivalent number of persons classified as classroom teachers divided by the full-time equivalent number of employees multiplied by 100.
